PLANET ASSOCIATES RELEASES LATEST VERSION OF PLANET® IRM INFRASTRUCTURE RELATIONSHIP MANAGEMENT SOFTWARE

New version aids administration and eases bulk data imports

Neptune, NJ – March 26, 2012 – Planet Associates Inc., the leading provider of Infrastructure Relationship Management (IRM) software and services for Enterprise Networks, has just released the latest version of Planet IRM with enhancements to administrative rights and bulk data operations.

Planet's latest feature enhancements are associated with IRM's Dynamic Data Reconciliation (DDR) module, which simplifies and expedites bulk loading of new data. New features include bulk moves and replacement of equipment, bulk creation of new sites and inner ducts, and overall speed enhancements. Unrelated IRM changes include administrator lock-out privileges and auto-generation of basic equipment representations.

"A great deal of our clients' time is spent keeping IT asset information up to date in the system," said William Spencer, President and CEO of Planet Associates, "and we are happy to be able to expedite the process even further with our current improvements."

This latest release of Planet IRM includes additional enhancements to improve usability and expedite implementation processes.

About Planet IRM
Planet IRM is designed to consolidate critical infrastructure information and streamline IT operations through a single, centralized, visual data repository, which improves operational efficiency and service levels, reduces network disruptions and downtime, and provides the cohesion necessary for accurate and thorough critical system analysis.

Planet IRM is available through the US General Service Administration's schedule GS-35F-0928N or via the Department of Defense Enterprise Software Initiative and SmartBUY Blanket Purchase Agreements.

About Planet Associates Inc.

Planet Associates Inc., located in Neptune, N.J., develops, licenses and supports the Planet IRM family of infrastructure relationship management software products. Planet IRM is uniquely capable of total enterprise network asset consolidation, incorporating Inside and Outside Cable Plant, Data Center, WAN, and User/Desktop Management, and all interconnectivity.
